CEO Message

Tradition and innovation: these two opposing terms have built our presence and they are building our future. With technology and experiences, we have accumulated knowledge manufacturing glass for the last 50 years. We have not only enlarged our B2B focused bottles and cans business but also have opened the gate to B2C focused business by successfully setting Glasslock, our brand for airtight heat-resistant tempered glass containers. Now, Samkwang Glass is challenging to expand its business to outstanding kitchenware to become a leading global company of Korea.

Soon after the launch of brand "Glasslock" it took the top in Korean market and second in global market. Such success of Glasslock was with innovative idea to make a product completely new to the market, by applying airtight four latching lid to highly versatile heat-resistant tempered glass. Samkwang Glass has an independent research center and constantly releases new products that reflect inputs from various sources. We have passed the rigorous food safety standards of the U.S. and Germany and won a number of international design awards with quality and design. In 2013, we entered a partnership contract with GROUPE SEB, which owns the world's top kitchen brand, Tefal, and launched a co-branded 'Tefal Glasslock'. Currently, we have developed as a general kitchenware brands with diverse consumer brands such as eco-friendly glass airtight container brand Glasslock, tableware brand Etique, premium cookware brand CHEFTOPF, infant brand Glasslock Baby, tumbler/vacuum bottle brand Tumblock and pet brand O'Pet. We are also participating in making the world more clean and healthier for everyone through social contribution activities such as the "One Green Step" campaign that reflects our philosophy to be an environmental friendly company.

Samkwang Glass will continue to value the harmonious coexistence of people and nature and realize sustainable development based on innovation and creation to earn the trust of consumers, shareholders, and investors. We will also make our fullest efforts to contribute to the global economy development and fulfill our social responsibilities for the planet.

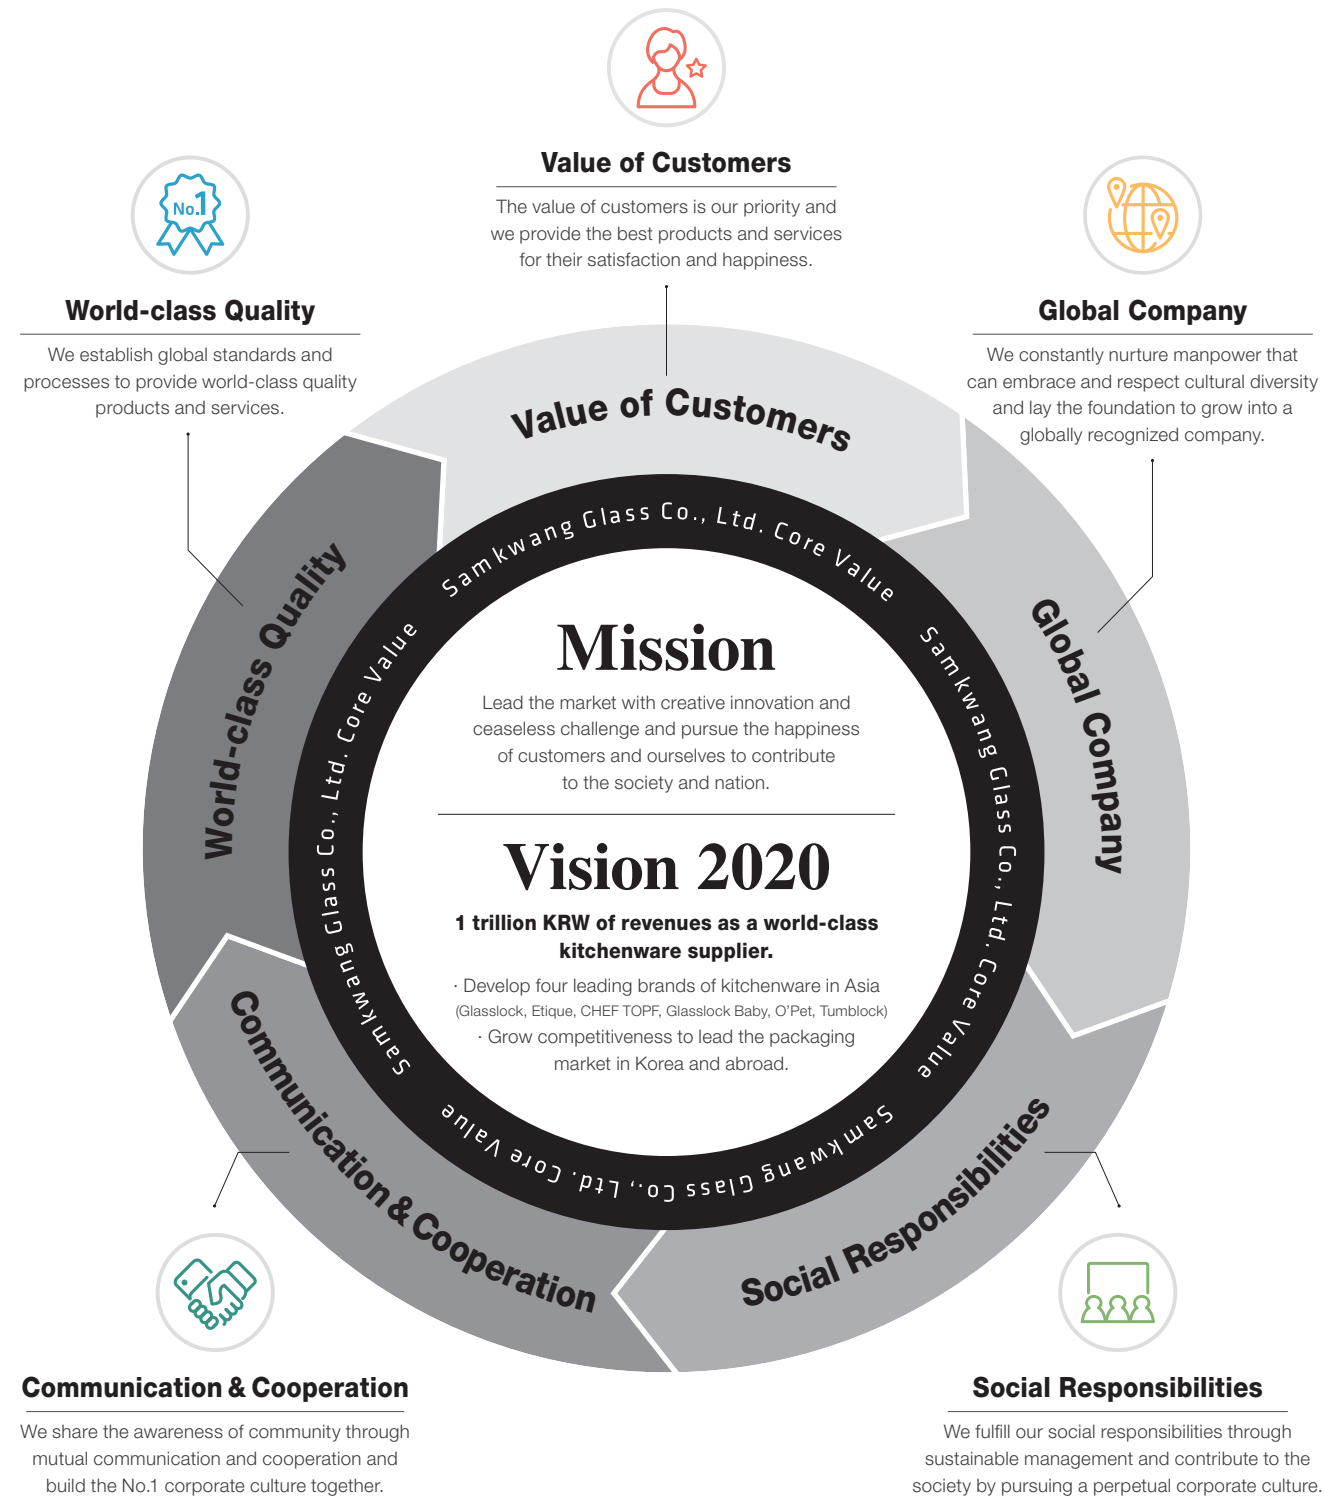

We thank you for your support and we promise our efforts to return the support and encouragement we have received.
Thank you.

President/CEO

“From glass producer to outstanding kitchenware producer-Samkwang Glass is challenging the world beyond Korea.”

Mission & Vision

“Samkwang Glass - For a Better Tomorrow”

Management Principles

Customer-Centered

- We provide the best products and services for customers' satisfaction.
- We resolve customers' complaints and problems in a timely manner to provide better products and services.
- We respect customers' dignity and appreciate them all the time.

Righteous Management

- We respect human rights of all mankind.
- We comply with laws and ethics and do not make profit in unjust ways.
- We pursue transparency of business for fair competition.

Corporate Culture

- We do not use our position in the company for unjust/corruptive acts.
- We create a culture of mutual respect through trust and cooperation.
- We put the company's benefit before personal benefit and share the benefit with members of the organization.

Environmental Safety

- We comply with the laws and regulations related to the environment, minimize the problems that can cause in the production process, and take initiatives for environmental protection.
- We do not provide products and services that harm customers' health and safety and make efforts to create a healthier society.
- We create a pleasant work environment and prevent safety-related accidents.

Social Responsibilities

- We grow with the local society and nation and make efforts to create stable jobs.
- We build strategic partnerships for mutual growth with partners.
- We engage in more various and sustainable social contribution activities.

Ideal Image of Manpower

Creative

Leading changes with creative and innovative ideas and open to newness.

Challenge

Always willing to challenge and constantly challenging new possibilities.

Passion

Always passionate and making efforts to be on top with pride.

Ownership

Making efforts for personal growth and the development of company with ownership.

Integrity

Setting a good example based on honesty, integrity, and ethics.

Our Business

Glass Bottle/Can

Samkwang Glass Co., Ltd. has built Asia's greatest Nonsan Plant and has supplied glass bottles and cans to the food/beverage and pharmaceutical companies through our Cheonan and Daegu Plants.

The glass bottles made with quartz sand, limestone, soda ash, and cullet are eco-friendly and recyclable. The green and brown glass bottles mostly used to contain nonalcoholic/alcoholic beverages are great at shielding sunlight and UV rays to preserve the freshness of beverages for a longer period of time. Samkwang Glass Co., Ltd. has diversified the production line to meet the needs of customers and combined our accumulated technology with strict quality control for partnerships built on trust.

Cans are lighter than glass bottles for easier transport and thinner for more efficient heating and cooling. They are also recyclable. Samkwang Glass Co., Ltd. has completed an automated facility at our can production plants in Cheonan and Daegu to manufacture aluminum and steel cans in various sizes and specifications. We are also working to manufacture even lighter cans through technology innovation.

History

1967 Established.	1988 Acquired KS mark for glass bottle products.	1989 Acquired 'Q' mark for kitchenware and tableware made of glass.	1993 Company disclosed.	1994 Merged with OCI Company Ltd.	1998 Samkwang Can established.	2001 Acquired Samkwang Can for the can business division.	2002 Acquired ISO 9001:2000 Certificate.
-----------------------------	--	---	-----------------------------------	---	--	---	--

Glasslock

Glasslock is Samkwang Glass Co., Ltd.'s first consumer brand and signature brand. Founded in 2005 Glasslock supplies airtight containers completed with natural soda ash glass with Samkwang glass' TEMPERMAX(heat-resistant tempered glass) technology. The new idea to combine glass with airtight containers, coupled with the trends for health and environmental friendliness, has supported the growth of Glasslock that offers the benefits of both heat-resistant tempered glass and airtight containers. Now, Glasslock is Korea's No. 1 and the world's No. 2 brand that sells 7,200 pieces every hour in 92 different countries around the world in every continent. Glasslock is free of environmental hormones and recyclable. The eco-friendly soda ash glass that reduces carbon release at production has been certified for food safety. We also proven the beauty of our designs by winning a number of internationally acknowledged awards. We have actively gathered and reflected users' opinion to improve the convenience of use. We are constantly releasing various new products through ceaseless R&D. Based on our growing competitiveness, we are expanding partnerships with global distributors and multinational brands for a greater tomorrow.

Our Capacity

Nonsan Plant

Nonsan Plant is where Asia’s largest furnace manufactures. With the state-of-the-arts automated facilities, quality inspectors, and Korea’s one and only 8-colors printing line, Nonsan Plant is by far the greatest glass container factory in Asia and Samkwang Glass’ guarantee for quality.

From the glass bottles supplied to customers to the Glasslock products sold to consumers, all products of Samkwang Glass are manufactured in Korea. The raw materials of silica sand, limestone, and soda ash are mixed with a certain amount of cullet in the furnace and molded in the molds. Then, the automated inspection system, completed with the investment of 10 billion KRW, carries out precise inspection in several steps. The entire process from the mixing of ingredients to the shipping of finished products is monitored at the central control tower and the quality control committee of the company constantly insects and improves quality.

Samkwang Glass’ ‘Made in Korea’ strategy has earned the trust of Korean and Chinese consumers as one of the key factors of success of Glasslock. Nonsan Plant is constantly accumulating knowhow for greater capacity to earn the world’s recognition with our pride in ‘Made in Korea’ for quality.

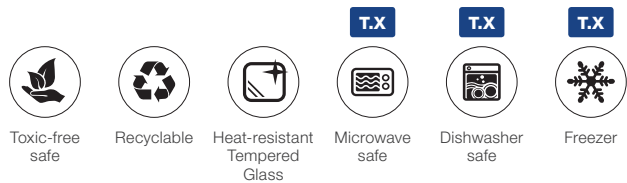

Overview

Building	Products	Raw Materials
Plant 1/Plant 2	Glass containers including Glasslock, glass bottles	Silica sand, limestone, soda ash, cullet

Our Brand

Glasslock, the airtight containers made of natural glass, offers a wide variety of products from tableware to storage containers with practicality and eco-friendliness.

Glasslock Baby is an kitchenware brand for kids, it is dedicated to supplying safe and eco-friendly products for children.

Etique is a total glassware that allows you to make a table spacial with a variety of designs, beyond the original function of the product. Have a great day with Etique.

O'Pet is an eco-friendly animal care product brand. It applies suitable design for animal dietary habit that keeps health and happiness of companion animal.

A premium cookware brand that presents safe cookware for the health of family with the love of a mother who prepares healthy food for the family.

Tumblock is life partner that gives special freedom. It stands for Tumbler+Lock and it gives locking function to tumbler for indoor and outdoor use.

Glasslock has its genuine glass tempering technology, known as Tempermax Technology, to maximize its durability and heat-resistance ability from -20°C to 230°C. Glasslock, four-sided latched food container, is also airtight and microwave-safe food container that does not generate any harmful chemical emission from itself unlike other plastic food containers. So, feel free to use Glasslock food container even when you enjoy delicious hot meal.

All products are eco-friendly products that are made with natural soda ash glass to reduce CO₂ emission and allow recycling after use.

Glasslock Container

The airtight containers with locks on all four sides and anti-slip design for safe use. Comes in various sizes from 120ml to 6,000ml and various shapes, including rectangular, square, and round shapes.

TEMPERMAX™

TEMPERMAX is a trademark that represents a distinctive glass tempering technique of Samkwang Glass Co., Ltd. TEMPERMAX technology has been applied to well-made Glasslock which has outstanding toughness and ability to endure extreme thermal resistance unlike imitations.

T.X Tempermax Glass **N.T** Non-tempered Glass

Basic type

Cap-PP | Ring-Silicone

The very first airtight, heat-resistant tempered glass containers and the signature products of Glasslock that are most popular.

Steady-seller

The steady-selling Glasslock products that have been most popular.

Completely airtight

Completely airtight with the silicone on the lid and the locking wings on all four sides.

Pure type

Cap-SK640(PS) | Hinge-PP | Ring-Silicone

Pure, loved by consumers with even more advanced functions.

Clear lids

Pure's lids are clear to make it easier to see what is contained inside.

Smart lids

The detachable wings and silicone gaskets make it easier to wash and clean.

Completely airtight

Completely airtight with the silicone on the lid and the locking wings on all four sides.

Air type

Cap- PP | Ring-Silicone

Convenient to use in a microwave with the steam-hole feature.

Convenient to use in a microwave with the steam-hole feature

The steam hole vents air to use in a microwave without opening the lid.

Completely airtight

Completely airtight with the silicone on the lid and the locking wings on all four sides.

Fancy type

Cap-PP | Ring-Silicone

Thin and transparent Fancy Lid for higher convenience and visual satisfaction.

More transparent lids

Fancy's lids are transparent to make it easier to see what is contained inside.

Completely airtight

Completely airtight with the silicone on the lid and the locking wings on all four sides.

Easy open type

Cap-LDPE

Convenient one-touch cap that can be opened and closed easily.

Convenient one-touch cap

Convenient one-touch cap can be opened and closed easily.

Fridge tidy up organizer

It is easy to store by applying a groove on the top of the cap for tidy up refrigerator containers.

Etique

Etique is a total glassware that allows you to make a table spacial with a variety of designs, beyond the original function of the product. Have a great day with Etique.

Stylish

Heritage

Multipurpose

Etique is the tableware brand of SamKwang Glass. Etique is a compound word of elegant and boutique, and it expresses the elegance and specialty of glass that can be lasted and preserved for a longtime. The concept of Etique started from the idea "Let glass makes your lifestyle at home happy", and it changes your small space stylishly.

Etique N.T

Etique makes your valuable space classically and elegantly.

CHEF TOPF

Attract consumer's attention with modern designs acknowledged by international design awards such as Red Dot, iF in Germany, and Good design in US.

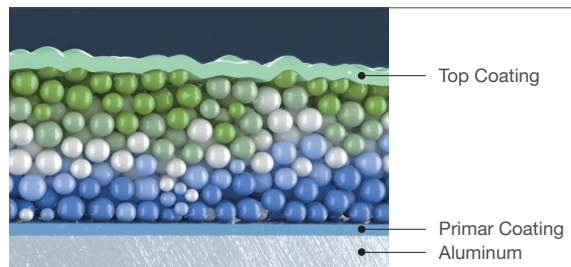

CHEF TOPF is Samkwang Glass' multi kitchen lifestyle brand.
CHEF TOPF, meaning 'chef's magical jar' brings a sweet changes to your kitchen.
With CHEF TOPF's safety against harmful materials and modern design, be the happy chef whilst serving magical dishes to your family.

Coating Ability

Plus is great for the table directly from the refrigerator.

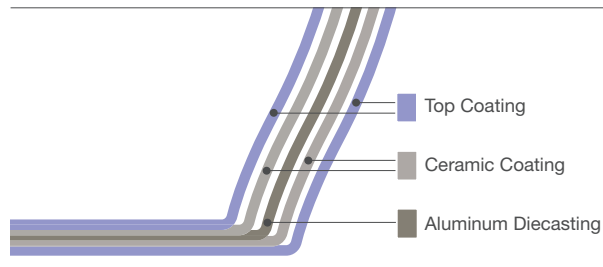

Granoble-Coating (PTFE Coating)

Six layers of Miracle Volumn Dots was applied onto cookware, so the surface is highly durable, and it's not easily scratched or peeled off.

Ceracle-Coating (Ceramic Coating)

An eco-friendly coating with natural materials but harmless released in the cooking process. Highly durable on the surface, so will not peel or scratch easily and stays non-stick for a long time.

La Bella

Smart system of steam control for better tasty cook.
